**All the Angels Come** is a work of fiction in a big screen age where the Tony Starks and Bruce Waynes don their costumes and leave their mansions. There are those among us who have neither. They can be heroes too. The story begins with Willis, Masuyo, Jay and Ricardo. You may have met them before; a familiar face in a familiar place. Get to know them, as a certain river city discovers its inherent magic when all the angels come.

*"All the Angels speaks to the curse of stereotyping, the value of the individual and the blessings of diversity. The cast of characters are all but typical yet carry values that are universal. In the spirit of anthropologist Adolf Bastian's psychic unity, the angels are better when they are together, a metaphor for all of us."* – Jim Alabiso

"The city is ripe for an epic fairy tale." - Sherry Carter Garbarini

"The writing is a character in and of itself."

"I tripped and fell down this hole, enjoying every word on the way. thank you."

"Engaging reading! Immersive! Just like water, the words draw me in, propel me forward."

"An amalgam of ideas and locations and people and regrets...beautiful writing, high on impact."
